DESCRIPTION

APIX G6.2A – APIX G6.1A print and apply system for pallet labelling is a pneumatic applicator for A5 labels on two adjacent sides of the pallet.
It’s a printing solution for UCC/EAN-128 and SSCC barcodes, with real-time label application, for identification and traceability of products and packaging.
Available on either one or two consecutive sides of the pallet, with rotation of the pad plate, it guarantees high reliability and print quality, with on-board laser scanner for the labelling verification.
Intelligent and customisable logic, thanks to its high versatility of configuration, capable of answering to the management functions required by the different process’s stations of end-of-line pallet.
Great autonomy and profitability, easy to insert on motorised roller for pallet transport.
The machine meets the Industry 4.0’ needs.
