DESCRIPTION

Plus 12.000 II: Interactive kiosk for shopping and self-service payments

Fast payments and precise change with 4 banknote denominations

Equipped with a large and bright touch screen, the Plus 12.000 II interactive kiosk for automatic payments allows the customer to choose products and quantities and then pay by electronic payment or cash. In this last case, specifically, the machine is able to return the change in both banknotes and coins.

The Plus 12,000 II interactive payment kiosk guarantees security and speed in the provision of change.

It minimizes the initial fixed assets of money inside the armored device and uses up to 4 banknote denominations to dispense the change.

Once the purchase has been completed and the payment has been made, the interactive kiosk for automatic payments Plus 12.000 issues the customer with a fiscal receipt, in the event that it is decided to manage the taxation directly from the machine, or a non-fiscal receipt that the customer will present to the customer. bench. Alternatively, the order can also be forwarded to any other workstation within the business, such as a kitchen, a bar or a product delivery point.
