DESCRIPTION

Plus 5702 Rugged Smartphone: so many features in one device

Equipped with a **high-capacity battery** (5580 mAh), the Plus 5702 rugged smartphone can operate for long periods continuously and without interruption. The phone lasts more than 600 hours on standby!

The device supports **two nano-SIM cards** or one nano-SIM card and one **SD memory expansion card**. The micro USB port is dedicated to connecting a wired headset, a cable for data synchronization and for charging the smartphone.

Another relevant feature of the Plus 5702 is its **high connectivity**, thanks to the latest **4G LTE and WIFI** modems. The geolocation module supports GPS, Glonass and Beidou networks. It will allow you to know your location and guide you anywhere.

Tested in all conditions, the smartphone can withstand drops from 1.5 m on concrete. The device can withstand hammering, pressure and force. In the workplace or in the field, this device is an **extremely rugged and reliable solution**.
