DESCRIPTION

Ultra-thin and ultra-powerful

The PC POS Plus 55 is designed to improve efficiency and productivity in the retail sector. With a robust and durable design, it is the perfect solution to optimize payment management and point-of-sale operations.

The device features a 15″ LCD touch screen display, offering high resolution and an intuitive, smooth user experience for the operator. To meet customer needs, the system can integrate:

- An optional VFD 2×20 customer display,
- Or a second 10.1″ monitor, ensuring maximum visibility of sales information.

Thanks to its sturdy structure and optimized payment process, the POS 7010 is an essential tool to improve point-of-sale efficiency and support your business success.
