

Rugged Mobile Terminal Plus RK26

Rugged Mobile Terminal with Wi-Fi 6 for Efficiency and Precision in Retail and Light Warehousing

The PLUS RK26 is the rugged mobile computer running Android 12 (upgradeable to Android 14), ideal for retail and light warehouses. It combines an ergonomic design for one-handed operation with powerful performance (Qualcomm octa-core, 4GB/64GB) and advanced Wi-Fi 6 connectivity. It is drop-resistant from 1.5 m and IP65 rated. It offers versatile data capture with long-range 1D/2D scanning (up to 12.2 m) and optional UHF RFID support, ensuring maximum efficiency and accuracy.

DESCRIPTION

The **PLUS RK26** is a reinforced mobile computer specifically engineered to optimize the efficiency, accuracy, and operational continuity in retail environments and light-duty warehouses. Thanks to its compact and ergonomic design, which reduces fatigue, it is ideal for prolonged, one-handed use. Its powerful performance is guaranteed by the Qualcomm octa-core 2 GHz processor and 4GB/64GB memory, ensuring smooth and reliable operations. The operating system is **Android 12 (upgradeable to Android 14) with AER** (Android Enterprise Recommended) certification for high enterprise security. The terminal excels in connectivity and data capture.

Connectivity: Equipped with Wi-Fi 6 and 2x2 MU-MIMO technology, it ensures faster, more reliable, and low-latency wireless connections, even in crowded environments. It also supports 4G LTE and Bluetooth 5.1.

Data Capture: It offers 1D/2D scanning engine options (Standard, Middle, and Advanced) capable of capturing barcodes from distances over 12.2 meters (with the advanced-range reader). UHF RFID functionality can be easily added via the dedicated reader accessory.

The device is built for resilience: it has an IP65 rating, resistance to multiple drops from 1.5 m (up to 1.8 m with rubber boot), and a display protected by Corning Gorilla

TECHNICAL SPECIFICATIONS

The PLUS RK26 is the rugged mobile computer running Android 12 (upgradeable to Android 14), ideal for retail and light warehouses. It combines an ergonomic design for one-handed operation with powerful performance (Qualcomm octa-core, 4GB/64GB) and advanced Wi-Fi 6 connectivity. It is drop-resistant from 1.5 m and IP65 rated. It offers versatile data capture with long-range 1D/2D scanning (up to 12.2 m) and optional UHF RFID support, ensuring maximum efficiency and accuracy.

Glass. The 4-inch multi-touch display with 500 nit brightness ensures optimal readability, even in direct sunlight. The PLUS RK26 guarantees prolonged productivity thanks to its replaceable 4000 mAh battery.
