Pluricode AL-130 BILL VERIFIER

intelligent and reliable

The Pluricode AL-130 bill verifier is an intelligent and reliable device hat easily detects false banknotes. In less than 0.5 sec, it examines and reverses the exit direction in case of false note.

COD: RTVBBV001
PLURISERVICE CODE RTVBBV001

Retail

DESCRIPTION

VERIFIED BANKNOTES AND FALSE DETECTION IN LESS THAT 0.5 SECONDS.

The Pluricode AL-130 bill verifier examines a banknote in less than 0.5 seconds, signaling the suspect note via audible alert and error message on display and reversing the exit direction. The LCD display shows the total pieces and banknotes verified. AL-130 bill verifier performs 5 controls: banknote size, ultraviolet, magnetic ink, security thread and infrared. The rolls and sensors can be easily cleaned by simply lifting the housings. For new upcoming bills, its software is upgradeable via USB cable (included).

TECHNICAL SPECIFICATIONS

False Verification Methods: IR, MT, MG, 2D, Image, Color
Currency: EURO Loading: Manual
Dragging: Motorized
Machine dimensions: 155 × 137×82 mm
Net Weight: 0.45 KG excluding battery
Counting speed: <0.5 seconds per bill
Validation: backlit alphanumeric display
Acoustic signal in case of suspect banknote
Consumption: 6.6W (MAX)
Power supply: 100-240V 50 / 60Hz (included)
