DESCRIPTION

The First Certified Telematic Fiscal Cash Register

The RT Telematic Printer is a sector pioneer, representing the first fiscal cash register certified in compliance with Legislative Decree 127/2015. This is not merely an update or an adaptation, but an ECR fully approved by the Italian Revenue Agency (Agenzia delle Entrate), highlighting its advanced technology.

Aesthetic and Ergonomic Design

From an aesthetic and functional perspective, the RT Telematic Printer stands out with its elegant and essential design. Its compact structure offers both ergonomics and functionality, ensuring practical and pleasant daily use.

Cutting-Edge Technology for an Optimized Sales Experience

Equipped with the most advanced ECR features, this telematic printer is designed to streamline the sales process. The retractable service keyboard with a backlit display, the front USB port, and the "low/end of paper" sensor provide unprecedented convenience.

Maximum Connectivity and Versatility

The RT Telematic Printer distinguishes itself through its superior connectivity with all peripherals. USB, micro USB, serial, Ethernet, and optional Wi-Fi ports allow for seamless connection to PCs, tablets, smartphones, scanners, scales, and POS systems, making the product highly flexible and suited to daily sales requirements.
