DESCRIPTION

The solution for general over-the-counter sales

Conceived, designed, and expanded through years of development in close collaboration with industry professionals, our software offers all the features you need with the ease of use you expect from a next-generation application.

Fast and reliable, featuring a fully customizable, visually rich, and engaging interface—once you start using it, you'll wonder how you ever managed without it. E2K Store provides all the functions required for your daily operations:

- Touch-screen sales management
- Orders and purchases
- Collections and payments
- Quotes and schedules
- Inventory management
- DDT (Delivery Notes) and invoices
- Accounting journals (Prima Nota), and more.

E2K Store can manage multiple warehouses simultaneously, keeping you informed about supplier orders, internal stock transfers, and goods receiving. It also handles Bills of Materials (BOM) and item processing/transformations, providing real-time sales tracking.

Advanced statistics allow you to monitor inventory status—including low-stock items, sales trends, and stock levels—while evaluating staff productivity. Finally, you will have the freedom to focus on what really matters: selling and planning your business activities and resources. With E2K Store, everything becomes simpler, smoother, and faster.

TECHNICAL SPECIFICATIONS

Goods Inbound/Outbound Management:

- Registration of inbound delivery notes and Delivery Notes (DDT).
- Management of returns to suppliers.

Real-Time Inventory:

- Capability to perform full or partial inventories (by category, supplier, or shelf) using a barcode scanner.
- Immediate detection of inventory discrepancies.

Supplier Order Management:

- Creation of purchase orders directly from the handheld terminal while checking the shelves.
- Order suggestions based on minimum stock levels or sales data.

Labeling and Pricing:

- Print requests for price tags or product labels directly from the handheld device.
- Instant check of prices and shelf stock levels.

Internal Stock Movements:

- Goods transfer between different warehouses or multiple points of sale (in multi-store configurations).
- Management of production loads (specifically for the Food sector).

Integration:

- Native synchronization with the E2K central database.
- Support for 1D and 2D barcode scanning.
