DESCRIPTION

Designed to optimize workflows in warehouses or production lines, the semi-automatic label dispenser DL120 is built with a robust painted sheet metal structure. Thanks to its integrated photocell for pitch reading, the device dispenses labels with extreme precision, stopping automatically after each pickup.

This semi-automatic label dispenser DL120 is equipped with an automatic rewinding system for waste siliconized paper and an adjustable label-brake brush to ensure optimal tension. For those needing to manage specific materials, the DL.120T variant is also available, specifically designed for transparent labels.

TECHNICAL SPECIFICATIONS

Label Width: from a minimum of 15 mm to a maximum of 120 mm.

Label Length: from a minimum of 15 mm to a maximum of 300 mm.

Roll Capacity: internal diameter 38 mm and external diameter up to 300 mm.

Components: stainless steel dispensing blade and ring-shaped plastic label guides.

Sensors: photocell for label pitch reading and a micro-switch sensor for label pickup detection.

User Interface: label recall button, ON/OFF LED, and a red LED for alarm signaling.

Machine Dimensions: width 290 mm, length 360 mm, height 330 mm.

Weight: approximately 9.7 kg.

Power Supply: 220 V 50Hz.
