## DESCRIPTION

The **Plus Outdoor Interactive Kiosk** is a multimedia kiosk designed to deliver reliable digital services in outdoor environments. Featuring a **27-inch display** with **2000 nits brightness**, it ensures excellent visibility even in direct sunlight, making it ideal for information points, self-service stations, queue management systems, ticketing applications, and interactive digital signage.

Its **IP65-rated capacitive touchscreen** provides an intuitive and accurate user experience while offering protection against dust and water, ensuring reliable operation in demanding outdoor conditions. Powered by an **Intel Core i5 processor**, **8 GB RAM**, and a **128 GB SSD**, the kiosk delivers the performance required for professional applications.

To provide a complete self-service solution, the kiosk includes an **80 mm thermal printer** and an **integrated 1D/2D barcode scanner**, enabling users to print tickets, receipts, or documents and scan barcodes and QR codes without the need for external peripherals.

Thanks to its wide range of connectivity options, the Plus Outdoor Interactive Kiosk can be easily integrated with business software, payment systems, booking platforms, information services, and custom-developed applications.

It is the ideal solution for businesses, public institutions, healthcare facilities, retail stores, hospitality venues, logistics operators, and any organization looking to automate customer interaction through a modern and professional digital access point.
